

# GTEK Laboratory Jaw Crusher Brochure

## Description

GTEK Laboratory Jaw Crusher is designed for fast and efficient crushing of medium-hard rocks and ores. It is compact and of rugged construction for general laboratory or small pilot plant operations. GTEK Laboratory Jaw Crusher have a wide range of applications across many industries such as mining, metallurgical industry, coal, geology and chemistry.

## Advantages

- Simple structure, easy maintenance;
- Stable performance and low noise;
- Even final particles and high crushing ratio.
